

Minimum System Requirements

Minimum Foresight Workstation Requirements:

- Windows XP SP 3 (or higher), Windows 7 SP1 (or higher), x86 or x64
- 2.4 GHz or faster processor, multiple processor cores recommend
- 4 GB RAM or higher, 8 GB RAM recommended
- 1 GB available free disk space
- An active internet connection is **required** for authentication and updates to Foresight

Minimum Foresight Database Server Requirements:

- Windows Server 2003 SP 2 or higher, Server 2008 or Server 2008 R2, x86 or x64
- SQL Express 2005, SQL Express 2008 or SQL Express 2008 R2*
- 2.4 GHz or faster processor, multiple processor cores recommend
- 4 GB RAM or higher, 8 GB RAM or higher recommended
- 2 GB available free disk space.

Additional drive space may be required depending on the size of your data.

***Note:** For a single user environment, both Farin Foresight and SQL Express may be installed and run on a single workstation. We recommend that Foresight databases be stored within a dedicated SQL Instance, and not in a shared database configuration containing other databases. SQL Server may also be used, but is not required.

System requirements are subject to change without notice.
Please contact Farin & Associates, Inc. to ensure you have the most recent recommendations.
